

ESCAPE Harness

MINIMALIST SOFTSHELL HARNESS

The ESCAPE Softshell Harness is specifically designed for downwind sessions and offers maximum freedom of movement on the water.

The focus lies on efficient stash & redeploy handling: the parawing can be compactly stowed during the session and quickly redeployed when needed - ideal for hooked-in upwind sections and the transition into the next downwind run.

HIGHLIGHTS:

ULTRALIGHT DOWNWIND HARNESS

EFFICIENT STASH & REDEPLOY

MAXIMUM FREEDOM OF MOVEMENT
