

# FLY SURFER

## FOX TRAINER

<b>SIZE:</b>	1.5 m
<b>TECHNOLOGY:</b>	Open-Cell Foil Kite
<b>FOCUS:</b>	Progression
<b>SKILLS:</b>	Beginner

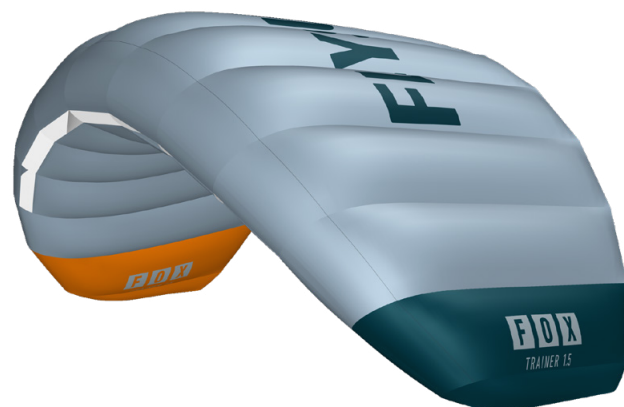

### HIGHLIGHTS:

3-LINE SAFETY SYSTEM  
LEARN AND EXPLORE  
KITE ON TARMAC AND ICE

Meet the FOX, a smartly designed kite that guarantees an easy set-up, excellent handling, and a swift self-relaunch. Take it to the skies filled with excitement and master the art of flying while your imagination soars!

### 3-Line Safety System

The proven 3-line safety lets the kite flag out with minimum power, as well as helping reverse launch. You can calmly take a break or reposition and re-launch the kite, enhancing your safety during sessions or lessons.

### RANGE OF USE

#### Learning Through Play

Give your children the greatest joy! The playful learning approach and getting to know the fascination of wind with its physical and coordination challenges are guaranteed to keep you away from smartphones. Show them the world from the perspective of a wind sports enthusiast. We recommend flying the FOX for ages six and up.

#### Training

It is ideal for getting to know the wind window and kite controls. For decades, trainer kites like the FOX have been the most popular tool for introductory courses or the first steps in kite sport.

#### Tarmac and Ice

The FOX is often used for kiting with skateboards, inline, or ice skates. It develops enough power to have real fun on asphalt or ice. Safety awareness, steering with one hand, and reasonable kite control are required. We recommend using helmets and various protectors when kiteboarding on land.

### SCOPE OF DELIVERY:

FOX Trainer Kite  
FOX Trainer Control Bar  
Wrist Leash  
Repair Cloth self-adhesive  
FOX Bag  
FOX User Manual
